

EDIGA SWATHIKALA

Software Developer | React Developer | Python Developer

swathikala65@gmail.com | +91-8073208165 | [linkedin.com/in/swathikala](https://www.linkedin.com/in/swathikala) | github.com/Swathikala2004

PROFESSIONAL SUMMARY

Results-driven B.Tech graduate transitioning into Software Development with hands-on experience building full-stack web applications. Proficient in React.js, Node.js, Python, FastAPI, and MongoDB, with real-world projects including a Device Booking System, E-commerce Platform, and a production-deployed QR Verification System serving 100+ students. Brings a unique edge from bioinformatics and computational biology experience. Seeking an entry-level Software Developer or Frontend Developer role to contribute to impactful, scalable applications.

TECHNICAL SKILLS

Frontend:	React.js, HTML5, CSS3, JavaScript (ES6+), Responsive Design
Backend:	Node.js, Express.js, FastAPI, Python, REST APIs, Axios, Fetch API
Database:	MongoDB
Auth & Security:	JWT Token Authentication, Protected Routes, Role-Based Access
DevOps & Tools:	Nginx, Cloudflare (CDN, DDoS, SSL), Git, GitHub, VS Code, Linux
Concepts:	Component-Based Architecture, API Integration, SPA Routing, Error Handling

PROJECTS

Internal Device Booking System | React.js · Python · FastAPI · MongoDB

- Built a centralized booking platform for device management, eliminating scheduling conflicts across teams.
- Developed REST APIs using FastAPI (Python) with MongoDB for efficient booking data storage and retrieval.
- Implemented authentication and a responsive dashboard with real-time availability and booking history.

E-commerce Web Application | React.js · JavaScript · REST APIs

- Developed a fully responsive e-commerce frontend with dynamic product listing and filtering.
- Integrated cart functionality with state management and REST API calls using Axios.
- Optimized component architecture for reusability across product pages, cart, and checkout flow.

INTERNSHIP

Student QR Verification System | React.js · REST APIs · JWT · Nginx · Cloudflare

- Deployed production-ready QR-based student identity verification system serving 100+ students with zero unauthorized access after deployment.
- Implemented JWT token-based authentication with protected routes and dynamic URL handling for authorized staff access.
- Integrated REST APIs using Axios with robust error handling for HTTP 401, 403, 400, and 500 responses along with graceful UI feedback.
- Configured Nginx SPA routing to prevent refresh-related 404 errors and used Cloudflare for DDoS protection, SSL security, and global CDN performance optimization.

EDUCATION

B.Tech — Biotechnology (74%) Kalasalingam Academy of Research and Education	2021 – 2025
Intermediate Bi.P.C (82%)	2019 – 2021

Sri Chaitanya Junior College

SSC (82%)
Z.P.G.H School

2018 – 2019

CERTIFICATIONS

- Python Programming Certification — ENOBOTT
- AI Workforce Experience Centre Training
- Cambridge English Business Certificate (BEC)
